Past LHSC Record: <input type="checkbox"/> Yes <input type="checkbox"/> No      Past SJHC Record: <input type="checkbox"/> Yes <input type="checkbox"/> No		

A Health Screen is an integral part of your hospital appointment and **must** be completed prior to your start date. The required/recommended immunizations or proof of immunity and TB testing may be obtained at your family physician/primary care office, local health unit, or community clinic.

Visiting Elective Physicians who perform exposure-prone procedures have an ethical responsibility to know their serological status for Hepatitis B Virus, Hepatitis C Virus and Human Immunodeficiency Virus (HIV). Those who learn they are infected should seek advice from their professional regulatory body. For those with no regulatory body, the local Medical Officer of Health or OHSS can provide advice with respect to recommended safe work practices.

**Prior to your anticipated start date**, return this completed form with **PROOF** of immunizations/immunity to Occupational Health and Safety Services (OHSS) at Victoria Hospital. OHSS will contact you if any requirements are outstanding.

Visiting Elective Physicians who decline vaccinations may require work restrictions and/or a work accommodation. Work accommodations are based on the relevant exposure risks, and subject to the hospital's ability to accommodate.

Fax: 519-685-8374  
Email: [OHSS-medicalaffairs@lhsc.on.ca](mailto:OHSS-medicalaffairs@lhsc.on.ca)

## REQUIRED VACCINATIONS

### Red Measles

You require 2 doses of measles containing vaccine with the first dose being given on or after your 1st birthday and the second dose given at least 4 weeks from the first dose OR laboratory evidence of immunity.

### Rubella

You require 1 dose of rubella containing vaccine, given on or after your 1st birthday OR laboratory evidence of immunity.

### Mumps

You require 2 doses of mumps containing vaccine with the first dose being given on or after your 1st birthday and the second dose given at least 4 weeks from the first dose OR laboratory evidence of immunity.

### Varicella (Chicken pox)

You require documented receipt of 2 doses of varicella vaccine (e.g., physician's certificate or vaccination record) OR laboratory evidence of varicella immunity, or laboratory confirmation of disease. Immunization is required for those without immunity.

### COVID-19

2 doses of Vaccination for COVID-19 is required for all hospital employees, professional staff, residents and clinical fellows, and is offered via local COVID-19 Vaccination Clinic Sites and primary care offices.

#### **Important information about COVID-19 vaccination and timing of other vaccinations:**

Other vaccinations should not be given within 14 days prior to, or 28 days following administration of a COVID-19 vaccine. If a TB skin test is required, it must be administered and read before immunization with a COVID-19 vaccine. Vaccination with COVID-19 vaccines may take place at any time after all steps of TB skin testing have been completed. If a TB skin test must be administered after immunization with a COVID-19 vaccine, it must be delayed for at least 4 weeks after immunization took place.

### Influenza (flu)

Seasonal influenza vaccination, or completion of an attestation form is required. LHSC and SJHC offer onsite influenza vaccination during the influenza season.

## RECOMMENDED VACCINATIONS

### Hepatitis B

It is recommended that all health care workers receive a course of Hepatitis B vaccine. For your protection, it is important to obtain a Hepatitis B antibody titre following immunization to ensure that you are adequately protected. If you have been vaccinated, please provide laboratory evidence of immunity.

### Tetanus/Diphtheria/Pertussis (Tdap)

A one-time dose of Tetanus/Diphtheria and Acellular Pertussis booster is recommended regardless of the date of your last Tetanus/Diphtheria vaccination. Those who are providing care to pregnant women and/or children should receive a Tdap as soon as possible.

### Tetanus/Diphtheria

It is recommended that you receive a primary series of Tetanus/Diphtheria in childhood followed by a routine booster every ten (10) years.

### Meningitis:

Vaccination for meningitis may be recommended if working in a microbiology laboratory where routine exposure to preparations of cultures of *N. meningitidis* are likely.

## TUBERCULOSIS (TB) SURVEILLANCE

### Tuberculosis (TB) Skin Test

Proof of a baseline two-step TB skin test is required regardless of history of BCG vaccination. If the two-step TB skin test was administered over 12 months ago, proof of an additional one-step TB skin test administered in the last 12 months is required as well.

**NOTE:**

- IGRA results are not accepted as an alternative to the TB skin test. A baseline two-step TB skin test is a requirement in accordance with the Communicable Diseases Surveillance Protocols for Ontario Hospitals (OHA, 2018).
- A TB skin test can be done on the same day as live vaccines (MMR and Varicella). If not given on the same day, the TB skin test must not be done until at least 4 weeks after the live vaccines.

### Positive TB Skin Test

A chest X-ray and associated report is required and must be completed after the documented date of a positive TB skin test, or if there is a history of active TB disease. The chest X-ray results will be reviewed by the Occupational Health Physician/ Nurse Practitioner in order to rule out active disease. Another chest x-ray may be taken if clinically indicated. Consultation with a medical provider regarding a positive TB skin test is highly recommended. If you have not received counseling or advice concerning prophylactic treatment, you may be referred for an expert consultation. If you have already received counseling or advice concerning prophylactic treatment, please provide a copy of your consult note.

## N95 FIT TESTING

Fit testing is required every 2 years for all health care workers who wear an N95 particulate respirator as part of their job duties, as directed by Ontario Health.

Have you been fit-tested within the last 2 years for an N95 respirator?

- Yes (Send Fit Test Record to [N95FitTesting@lhsc.on.ca](mailto:N95FitTesting@lhsc.on.ca))
- No → **Fit-Testing at LHSC and St. Joseph's:**

Registration for an N95 fit-test is done through your ME (MyEducation) account. To access your ME account, you will require your Corporate ID, which will be emailed to you prior to your hospital start date.

## PERTINENT HEALTH INFORMATION

Do you have any allergies or health conditions that you feel Occupational Health & Safety Services should be aware of?  Yes → If **Yes**, provide details below  No

Do you have limitations/restrictions, or a disability that requires an accommodation in the workplace?

- Yes → If **Yes**, provide details below  No

## IMMUNIZATION HISTORY

Please complete the following immunization/history section. **Proof of immunization/immunity** is required and may include the following documentation: official public health vaccine record, documentation from your physician/primary care provider, immunization history from previous employer or educational institution (must be signed by a physician/nurse), and laboratory reports. Please provide supporting documents in **English**.

REQUIRED VACCINATIONS/PROOF OF IMMUNITY			
<b>Measles, Mumps, Rubella (MMR) Vaccination/Evidence of Immunity</b> (If full series provided, evidence of immunity not required)			
	Date	Result	Immune Y/N
